ABOUT ME

Motivated Materials Engineering graduate with a strong foundation in material characterization, process optimization, and product analysis. With hands-on experience and a detail-oriented mindset, I am eager to contribute to roles in Quality Control (QC), Product Control, Research & Development (R&D), or Product Development (PD) across various industries—including food, pharmaceutical, automotive, and electronics manufacturing. I am passionate about ensuring product quality, safety, and consistency while supporting innovation and continuous improvement. Adaptable and analytical, I thrive in fast-paced, globally oriented environments and am committed to helping organizations deliver high-performance, reliable, and competitive products to the market.
